SZYMON SKRZYPCZYK

ABOUT ME

I am a data engineering student of 3rd year at AGH, I have been working extensively with a number of programming languages over the last few years, with python most of all. I also speak Polish, English and German.

EDUCATION

Akademia Górniczo-Hutnicza
Engineering and Data Analysis WGGIOŚ
October 2022-Onwards

Zespół Szkół Salezjańskich w Krakowie
Math/Physics/IT(Networking) Class
Wrzesień 2016-Maj 2022

WORK EXPERIENCE

Programming teacher - Giganci Programowania
September 2022 - March 2023
My responsibilities were teaching children and developing their programming skills.

Support Engineer Intern - IBM
March 2023 - Onwards
My responsibilities are creating a chatbot for product support, as well as, working on a python project for a client. Thanks to the internship I have learnt a great deal about working in teams on projects.

THE MOST INTERESTING PROJECTS

Face Recognition Password Manager
Python/Keras/Opencv

Password manager that enables users to log in using facial recognition features implemented in python.

IAESTE SWIPE AND JOIN
React/JS/HTML/CSS

Co-creation of app made for recruting purposes of my student's organization. The app is based on tinder and has its most crucial features, which were necessary for us.

AI Trivia Generator
Python/Go/Langchain/Ollama/FastAPI

An app grasping the power of LLMs for creating trivia questions owing to Langchain and FastAPI, which are later send over to a Go Fiber API and send to a Postgres database,
